SOURCE Meditsinskii Rabotnik, No 14(826), 1949.DOCTORS NEEDED IN EASTERN USSR

Yelovikova, Chief
 Pervorechenak Rayon Pub Health Dept
 Vladivostok

Young doctors who have just graduated from medical schools are urged to go East to fill the many available vacancies. Last December, the Pervorechenak Rayon Public Health Department had 500 workers. Even though the local Party organizations and regional soviets have cooperated in every way there is still a shortage of competent personnel to fill the ranks of medical workers. Much is yet to be done to assure a safe water supply. There are many excellent sites for health resorts, of which the mud springs at Sad-Gorod rank foremost.

Under socialist conditions, the number of doctors in the maritime provinces has increased 20 times and the number of middle medical workers 40 times over the number available in Tsarist times.
